SUMMARY

Full-Stack Developer with a strong backend focus in C#/.NET and hands-on experience building and maintaining production systems across backend, web and mobile. Experienced in REST APIs, integrations, authentication, data processing, automated testing and CI/CD, with TypeScript, React and Next.js on the frontend. Comfortable taking ownership from technical design and implementation through testing, deployment and continued development in production.

PROFESSIONAL EXPERIENCE

2026/03 - 2026/06 **Software Developer** | Go.Do. AB, Ängelholm

- 2025/09 - 2025/11
 - Developed and maintained GODO, a production platform spanning backend, web and mobile applications.
 - Built and maintained a REST API with 60+ endpoints in C#/.NET, including authentication, authorization, subscriptions and external integrations.
 - Developed synchronization flows for validating, normalizing and deduplicating event data from external sources covering 197 Swedish cities.
 - Developed frontend functionality with TypeScript, React and Next.js, as well as a cross-platform mobile app with React Native and Expo.
 - Developed and maintained 300+ automated unit and integration tests and implemented CI/CD and production deployment with Docker and GitHub Actions.

2022/06 - 2024/02 **Civil Engineer** | Dala Trähus, Ljungskile

- Produced and coordinated technical documentation for construction projects.
- Worked across clients, suppliers and contractors and supported internal IT systems and technical tools.

2022/01 - 2022/06 **Freelance Architect & Business Owner**, Partille

2020/11 - 2022/05 **Architectural Civil Engineer** | **Volunteer Work**, EWB, Gothenburg

SELECTED PROJECTS

2026/07 - Present **VeloLog** | Cycling & Maintenance App

- Developed an Android-first, local-first cycling app with React Native, Expo, TypeScript and SQLite for tracking rides, bikes, components and maintenance without requiring an account or internet connection.
- Implemented background GPS recording with location filtering, interruption recovery, live ride statistics, automatic odometer updates and route visualization with MapLibre.
- Built component-wear and maintenance logic with local notifications, bilingual Swedish/English support and a testable domain layer with automated unit tests.

2026/01 - 2026/02 **PluggKompis** | Homework Help Platform

- Built a full-stack platform for finding and booking free homework-help sessions based on location, subject and availability.
- Implemented role-based workflows for coordinators, volunteers, parents and students, including scheduling, bookings, attendance tracking and PDF export.
- Designed the domain model, REST API, authorization and business logic using .NET, Azure SQL, React and TypeScript.

2025/06 - 2025/07 **FridgePal** | InFiNetCode, Hackathon, 1st Place

- Built a mobile prototype to reduce food waste using AI-based image recognition and OCR to identify groceries and expiration dates.
- Designed the backend API, business logic and validation flow for processing and storing identified grocery data.
- Implemented the backend with .NET, Clean Architecture, CQRS/MediatR, FluentValidation and Azure SQL.

EDUCATION

2024/09 - 2026/06 **.NET Software Developer**, NBI-Handelsakademin, Gothenburg

2013/09 - 2020/10 Architectural Civil Engineer | House building, Luleå University of Technology, Luleå

CORE SKILLS

Backend & APIs: C#, .NET, ASP.NET Core, Entity Framework Core, REST APIs, CQRS, MediatR, JWT Authentication, Role-Based Access Control (RBAC)

Frontend & UI: TypeScript, React, Next.js, Tailwind CSS, TanStack Query

Mobile: React Native, Expo SDK, Expo Router, i18next

Infrastructure & DevOps: Azure, Docker, GitHub Actions, Swagger, Postman, JWT Authentication, CI/CD pipelines, Rate limiting, Security headers

Database: SQL Server, PostgreSQL, SQLite, MongoDB

Testing & Development	NUnit, Unit Testing, Integration Testing, TDD, Agile/Scrum
----------------------------------	--

LANGUAGE

Swedish – Native proficiency English – Fluent

English – Fluent
